RESIDENTIAL WINDOWS & DOORS

# Features that Excel

On every door, warmth and beauty flourish with pine wood interiors, a perfect choice whether painting or staining.

Little or no exterior maintenance is required because each door is protected by extruded aluminum cladding; strong AND durable at the same time.

Clad exterior is available in a wealth of tones and finishes. Choose from one of Quaker's 38 "Quick Pick" colors or choose a custom powder coat color for a truly cutting-edge look.

All hinged doors contain a multi-point locking system featuring a three-point system for genuine security.

Multi-purpose Low-E glass packages will augment your home's energy efficiency and also helps carpet, rugs, flooring and furniture by repelling harmful U-V rays.

Extended panel drip edge sheds water away for enhanced protection.

Hinged doors are bolstered by anodized aluminum sills in a champagne color. Sliding doors possess fiberglass sills available in bronze or gray. All sills are made to withstand the rigors that come with frequent in-and-out activity.

Dual-seal frame weather strip at panel face and edge improves air and thermal performance.

Screens feature BetterVue™ mesh for improved vision and protection.

Resilient ball-bearing rollers on sliding doors never give in to excessive use and are extremely simple to adjust.

Quaker's warranty is one of the industry's best.

# Options that Define

Enhance energy performance with glass options.

Richen your door's aesthetics with wood panels (shown on right). Choose either the half or quarter panel design.

Any color in the rainbow is available on the aluminum clad exterior.

Grids. Multiple types. Multiple designs. Add them to help establish your home's style. *Simulated Divided Lites* lend an air of elegance and antiquity. *Grids Between the Glass* are dust-free, available in a flat or contoured shape, and can be single color or two-toned. *Wood Surround* grids add beauty and can be removed quickly for easy cleaning.

Pre-finished white or primed interiors are always an availability. Ask about custom painted interiors.

Hardware finishes are available in many flavors (see back page).

Add a special zest to your interior with *Alder Wood* in place of pine.

For swinging doors, alternate between insect protection and an unimpeded view with our Retractable screen option. Use it when you need it. Hide it when you don't.

# Doors that Perform

Brighton Series Patio Doors are built for energy efficiency. All styles can meet or exceed requirements set forth by the prestigious ENERGY STAR program.

### Narrow Rail Sliding Patio Door

U-Value: 0.25  
Solar Heat Gain: 0.19

### French Rail Sliding Patio Door

U-Value: 0.27  
Solar Heat Gain: 0.17

### In-Swing Patio Door

U-Value: 0.27  
Solar Heat Gain: 0.16

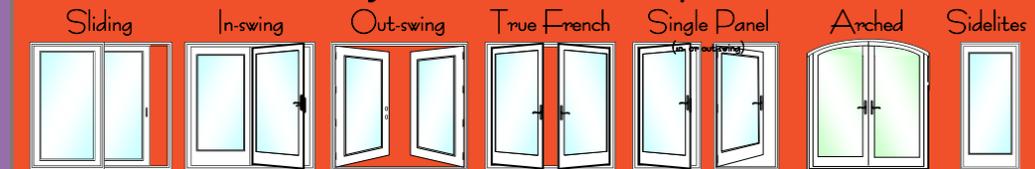

### Brighton Series Out-Swinging Patio Door

U-Value: 0.28  
Solar Heat Gain: 0.18

All values achieved with Quaker's EnergyMax glass added. Periodic re-testing is required thus data shown may vary slightly.

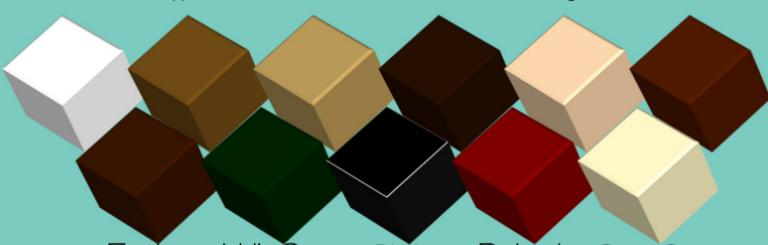

# Styles that Impress

Pick your door height from 6'8", 6'11", 8' or 9' standards. Or ask about available custom sizes. Stack geometrics shapes such as half rounds, elliptical, arch heads or transoms above any patio door for a spectacular, eye-catching entrance.

# Colors that Inspire

White Toffee Sandstone Dark Bronze Beige Chestnut

Earthtone Holly Green Black Redwood Satin Crème

Our 11 most popular colors are shown. Quaker has 27 other "Quick Pick" colors, plus we have custom color capabilities too. This allows you to go beyond the normal limits of design. If you've got a color in mind, we can match it.

Due to printing limitations, colors shown may not accurately reflect actual paint color. Quaker does not assume any responsibility for any misrepresentations of our standard colors. Please call your authorized Quaker dealer for an actual color sample.
