

Brighton Series Telescoping Patio Door

6-12-2020

Brighton Telescoping Patio Door Features

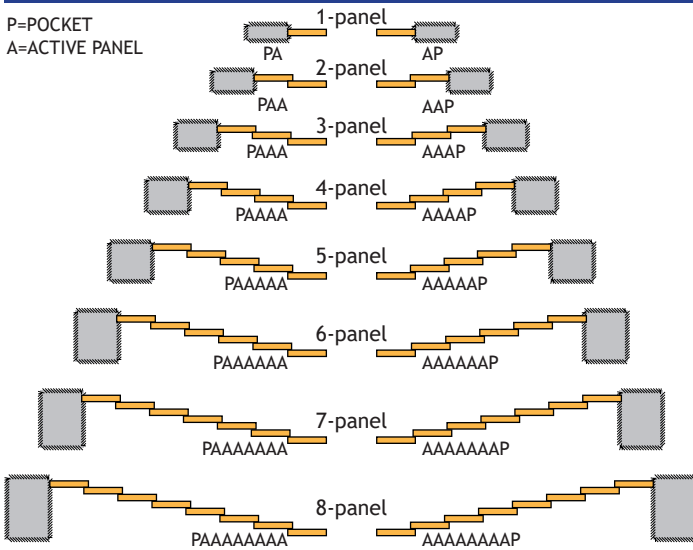

- Stacking and pocket configurations
 - * Stacking telescoping door systems stack all panels in line with the stationary panel, thus all panels are always visible in the stacking configuration
 - * Pocketed telescoping door systems incorporate a pocket in the wall cavity, thus all panels would be visible when the door is fully-closed, and all panels would be hidden in the wall pocket when the door is fully-open
- One panel (pocket only) to eight panel configurations with maximum overall frame width of 20'0"
- Door jamb depth will vary depending on the number of panels in your chosen layout
- Pine wood interior. Extruded aluminum exterior.
- French (wide rail) or Narrow Rail panel styles
- Main frame head and sill use dark bronze anodized aluminum extrusions
- Folding aluminum nailing fins
- Heavy-duty interlock improves air and structural performance
- Panels slide on two tandem, heavy-duty, end-adjustable, ball bearing rollers for smooth operation
- 3/4" insulated glass with Low-E. Tempered for safety.
- Two-point locking gear and keeper
- Flush-mounted handles with keyed lock
- Brushed nickel finger pull located at the edge of the lead operating panel
