

## TimberVu W-Series Doors

The artistic fusing of an architectural aluminum exterior with the classic look and feel of a natural wood interior provides the ageless charm found only in TimberVu W-Series Doors.

Duality by design, the melding of these complimentary materials offer the chance to customize your living space and visually share the timeless comfort seen throughout the broad spectrum of contemporary architectural planning.

Available in Swing or Sliding operational styles along with sidelites, transoms and multiple mulling configurations.

Unique to the market, the SolidCore™ Thermal Barrier System integrates an Azo-Core high-density foam that acts as an insulator against the natural conductivity of heat and cold, allowing for superior energy performance and product integrity regardless of size or operational style.

## Product Highlights - W-Series Swing Door

- Thermally Broken Aluminum Frame and Panels
- SolidCore™ Thermal Barrier in Doors
